Stack Trace

Frontend:

- HTML5/CSS3 – *Accessibility, Responsiveness*
- JavaScript – *ES7+, Vanilla, TypeScript, Flow*
- React – *Hooks, Gatsby, Next, React Native*
- Vue.js – *VueX, App Development, Directives*
- Apollo – *Caching, GraphQL Management*

Backend

- Node.js – *Express, SSR, Serverless Functions*
- MongoDB – *Test Fixtures, CRUD Operations*
- AWS – *S3, EC2, EB Deployment, SES, SNS*
- Firebase – *Auth, DB, Functions, Storage*

Tooling:

- CI/CD – *CircleCI, Appium, Selenium*
- Testing – *Jest, Mocha, Jasmine*
- Git – *Branching, Merging, Rebasing, Committing*

Interests

- Hardcore **movie fanatic**, especially Edgar Wright's work
- Total **podcast junkie**, top picks include: *Cortex, Syntax, My Brother My Brother and Me, Reply All*
- **Board game geek** at heart, loving *Spirit Island, Dead of Winter, and Coup*
- An absolute, unwavering **dog person**

Education

- Candidate for B.A.Sc. Honors Nanotechnology Engineering, *University of Waterloo, 2021*
- Plenty of online courses, certifications and learning modules, including
 - > *freeCodeCamp.org*
 - > *Wes Bos Courses*
 - > *egghead.io*

Summary of Qualifications

- Committed, self-taught **full-stack developer** with a unique technical **engineering background**
- Inquisitive and **perpetual student**, focusing free-time towards building cool **side-projects** just for fun
- **Geeky and passionate** to keep up with the industry, trying new stacks, and contributing to the community

Work Experience

Full-Stack React Native Developer – Winter 2019 (4m)

Shop Bonsai – Toronto, ON

- Implemented E2E tests with database fixtures for consistent, black-box reporting in CircleCI
- Refactored GraphQL API resolvers and queries in React Native to improve extensibility
- Actively participated in small-team Agile development activities like Scrum, Planning Poker and Sprints

Skills Improved: React Native, Apollo + GraphQL, CircleCI, iOS/Android

Advanced App Engineering Senior Analyst – Fall 2018 (4m)

Accenture – Toronto, ON

- Deployed cross-platform React widgets through peer programming and test-driven development
- Implemented Google Cloud Dialogflow to train, and deploy Virtual Agents with natural language processing
- Received formal training in DevOps/Design Thinking, with accreditation in Agile development from ICA Agile

Skills Improved: ES6 JS, React.js, Node.js, DynamoDB, AWS, Dialogflow

Projects

Custom URL Shortener - lgr.fyi

Shorten those ugly URLs with this AWS EB Node.js App;

Twitter CLI via Node.js - npmjs.com/package/twitter-cli

A little open source tool for those allergic to the Twitter UI

All My Shenanigans – leander.xyz/projects

The site itself is neat, but projects showcase has some of the cool stuff I've built over time!
